

**ECCO2, a Swiss company, is on a mission to contribute to a more sustainable world by reducing building energy consumption and CO2-emissions.**

**Our unique “ECCO2 Building Intelligence” solution combines high-resolution data from a network of IoT sensors and artificial intelligence to achieve predictive remote heating control. By delivering high quality, real-time data, ECCO2 also helps customers automate ESG reporting and make well informed decisions for their investments in building renovation.**

As part of our expansion efforts in the Czech Republic, our subsidiary based in Prague is seeking a:

## Building Energy Project Manager – 80-100%

### Key Responsibilities:

- Preparation, coordination, planning, deployment and monitoring of projects in collaboration with our teams in Switzerland
- Communication and project follow-ups with clients (property managers)
- Monitoring operation of our solution and providing support as needed.
- Developing procedures and partnerships for project deployments
- Training for clients and knowledge transfer

### Candidate Profile:

- Technical background in heating systems control
- Minimum 3 years of experience in construction, electrical field, or energy-saving systems
- Project management experience
- Fast learner with the ability to work independently
- Good organizational skills
- Problem solver
- Proficient in English

### We offer :

- Opportunity to work in a small and growing team
- Flexible working hours, including remote work
- Focus on high-tech and AI applications
- Possibility of learning and becoming a specialist in energy savings
- Access to the latest technology, including AI
- Attractive salary
